

Engineering Mentorship

This summer will you be...

- a rising junior or senior?
- interested in an opportunity to work with/for NASA?
- taking challenging courses and getting good grades?

The Summer Residential Governor's Mentorship in Engineering, hosted at the National Aeronautics and Space Administration (NASA)/Langley Research Center and the National Institute of Aerospace (NIA), is a free, summer program designed to provide challenging, real-life, team-oriented work experiences.

Students are given the opportunity to view engineering and research from a unique perspective and to become familiar with career options through their individual mentorships, their community time with other students, and their tour opportunities.

Mentorships:

- change each year based upon availability of NASA/NIA volunteer researchers
- are assigned based on student interest and experience, and
- occasionally, will be offered that are outside of a student's expectation and/or comfort zone

Applications are now being accepted. Selection is competitive. Not more than 12 intellectually gifted high school students will be selected.

For more information, visit the Virginia Governor's Mentorship in Engineering website at the NASA/NIA home page at <http://www.nianet.org/>
