

Features from Finalsite we do not get from current platform:

- Integrated email newsletter system with email lists from SIS (PowerSchool)
- Push to social from website content management system
- Unlimited page layouts and optimizations
- See changes as final without publishing
- Multiple edits per page before sending for admin approval with full-page approval (instead of element-by-element)
- Display personalized user content depending on stakeholder group (parent/guardian, student, staff/faculty)
- Native SEO-friendly URLs
- Custom 404 error page
- SEO-friendly 301 and 302 redirect management
- Adjustable page preview image
- Searchable directory via daily updates from SIS or HR System
- AI language translator with editable translations
- Social media integration without coding
- Scheduled content publishing
- Page-specific page-pops
- Advanced site search with internal site search syntax
- Mobile-first site design including Image optimization (photos converted to most compatible format)
- Staff/faculty portal / Staff Intranet with access to common logins, and news from school
- Parent / Guardian Portal with access to common logins, and news from school
